

Torch cleaning stations

Automatic torch cleaning stations for robot torches

Spatter is removed by rotating reamer

Sprays torch with anti-spatter fluid

Cuts off the wire end

The new torch cleaning station TBi BRG-2-ES is equipped with an enclosed spraying unit. The anti-spatter fluid is applied to the torch head in a controlled way. The robot cell will not be contaminated and less anti-spatter fluid is used.

Technical Data

Automatic torch cleaning station

Function pneumatic

Air supply oil-free compressed air, 6 bar

24 V DC Control signal

Cleaning cycle approx. 4 - 5 sec.

Anti-spatter fluid dosage adjustable Anti-spatter fluid container 500 ml

Wire cutting performance max. 1.6 mm steel wire

Weight approx. 14 kg (without pedestal)

ightharpoonup = Standard size reamer, included with the unit.

Reamer size must be chosen according to contact tip and nozzle used. The inner diameter of the reamer should be 1mm larger then the outer diameter of the tip. The outer diameter of the reamer should be 1mm smaller then the inner diameter of the nozzle.

Additional reamers optimized for use with the TBi RoboMIG RM2 torches are listed in our TBi RM2 catalog.
